

Quick Reference Guide

Fast answers for common tasks

Updating Content

Add New Images to Gallery

1. Go to Sanity Studio
2. Click on "Gallery Section" (Udvalgte værker or Håndværk)
3. Scroll to "Images"
4. Click "+ Add item"
5. Upload image
6. Add alt text (important for SEO!)
7. Optional: Add caption
8. Click "Publish"
9. Wait 2-3 minutes → Live!

Change Text

1. Go to Sanity Studio
2. Find the content type (Gallery Section, Site Settings, etc.)
3. Edit the text
4. Click "Publish"
5. Wait 2-3 minutes → Live!

Reorder Images

1. Go to Gallery Section in Sanity
2. In Images array, drag and drop to reorder
3. Click "Publish"
4. Wait 2-3 minutes → Live!

Start Development Server

```
bash  
npm run dev
```

Open <http://localhost:3000>

Stop Development Server

Press `Ctrl+C` in terminal

Test Production Build

```
bash  
npm run build  
npm run export
```

Files appear in `/out` folder

Deployment

Deploy Code Changes

```
bash  
git add .  
git commit -m "Description of changes"  
git push
```

Wait 2-3 minutes → Live!

Check Deployment Status

1. Go to GitHub repository
2. Click "Actions" tab
3. See latest workflow run
4. Green checkmark = success!

Force Redeploy (if stuck)

1. Go to Actions tab
2. Click "Deploy to GitHub Pages" workflow

3. Click "Run workflow" → "Run workflow"
 4. Wait 2-3 minutes
-

Troubleshooting

Images Not Showing

Check 1: Published?

- Go to Sanity Studio
- Make sure you clicked "Publish" (not just "Save")

Check 2: Correct Project ID?

- Check `.env.local` has correct `NEXT_PUBLIC_SANITY_PROJECT_ID`

Check 3: Wait

- Changes take 2-3 minutes to appear

Check 4: Clear Cache

- Hard refresh: `Cmd/Ctrl + Shift + R`

Build Failing

Check GitHub Actions:

1. Go to repo → Actions tab
2. Click the failed workflow
3. Read error message
4. Common fixes:
 - Missing secrets (add in Settings → Secrets)
 - Syntax error in code (check error line number)
 - Missing dependency (run `npm install`)

Webhook Not Working

Check Sanity Dashboard:

1. Go to sanity.io/manage

2. Select project → API → Webhooks
3. Click webhook → View logs
4. See if requests are sending

Check GitHub Token:

- Make sure token has `repo` permissions
- Generate new one if needed

Site Not Updating

Quick Fixes:

1. Hard refresh browser (`Cmd/Ctrl + Shift + R`)
 2. Check GitHub Actions completed successfully
 3. Check Sanity webhook sent (see above)
 4. Try incognito/private window
 5. Wait 5 minutes (sometimes CDN is slow)
-

Common Tasks

Add New Product (for future e-commerce)

1. Go to Sanity Studio
2. Click "+ Create" → "Product"
3. Fill in all fields:
 - Name
 - Generate slug
 - Description
 - Upload images
 - Material, dimensions
 - Price in DKK
 - Check "Available"
 - Check "Featured" if you want it highlighted
4. Click "Publish"

Change Logo

1. Go to Sanity Studio
2. Click "Site Settings"
3. Under "Logo", click to upload new
4. Click "Publish"
5. Wait 2-3 minutes → New logo appears!

Update Footer Info

1. Go to Sanity Studio
2. Click "Site Settings"
3. Edit CVR Number or Address
4. Click "Publish"

Change Contact Email

1. Update in Sanity Studio → Site Settings
 2. Also update Formspree endpoint in code:
 - File: `components/ContactForm.jsx`
 - Line with: `https://formspree.io/f/...`
 - Replace with your form ID
-

File Locations

Need to edit code? Here's where things are:

What	File
Navigation	<code>components/Navigation.jsx</code>
Hero logo	<code>components/Hero.jsx</code>
Gallery sections	<code>components/GallerySection.jsx</code>
Contact form	<code>components/ContactForm.jsx</code>
Footer	<code>components/Footer.jsx</code>
Global styles	<code>app/globals.css</code>
Colors/spacing	<code>app/globals.css</code> (<code>:root</code> section)
Homepage structure	<code>app/page.jsx</code>
Sanity queries	<code>lib/sanity.js</code>
Sanity schema	<code>sanity/schema.js</code>

Style Changes

Change Colors

Edit `app/globals.css`:

```
css

:root {
  --bg: #f7f6f4;      /* Background color */
  --text-primary: #1a1a1a; /* Main text */
  --text-secondary: #6f6f6f; /* Subtle text */
}
```

Change Spacing

Edit `app/globals.css`:

```
css
```

```
:root {  
  --space-xs: 0.75rem; /* 12px */  
  --space-sm: 1.5rem; /* 24px */  
  --space-md: 3rem; /* 48px */  
  --space-lg: 6rem; /* 96px */  
  --space-xl: 10rem; /* 160px */  
}
```

Change Font Size

Edit component `.module.css` file or `app/globals.css`

Environment Variables

Local development: File: `.env.local`

```
NEXT_PUBLIC_SANITY_PROJECT_ID=abc12345  
NEXT_PUBLIC_SANITY_DATASET=production
```

GitHub (for deployment):

1. Go to repo → Settings → Secrets
 2. Add:
 - `NEXT_PUBLIC_SANITY_PROJECT_ID`
 - `NEXT_PUBLIC_SANITY_DATASET`
-

Commands Cheat Sheet

```
bash
```

Development

`npm run dev` *# Start dev server*
`npm run build` *# Build for production*
`npm run export` *# Export static site*

Sanity

`cd studio`
`npx sanity start` *# Start Sanity Studio locally*
`npx sanity deploy` *# Deploy Sanity Studio*

Git

`git status` *# Check what changed*
`git add .` *# Stage all changes*
`git commit -m "msg"` *# Commit with message*
`git push` *# Push to GitHub*
`git pull` *# Pull latest changes*

Troubleshooting

`npm install` *# Reinstall dependencies*
`rm -rf node_modules` *# Delete node_modules*
`rm package-lock.json` *# Delete lock file*
`npm install` *# Fresh install*

Emergency Fixes

Site is Down!

1. Check GitHub Actions - did build fail?
2. Check GitHub Pages settings (Settings → Pages)
3. Check custom domain DNS (if using one)
4. Try deploying previous working commit

Content Disappeared!

1. Go to Sanity Studio
2. Check if content was accidentally unpublished
3. Check Sanity project ID is correct
4. Contact Sanity support if needed

Can't Log into Sanity!

1. Go to sanity.io
 2. Click "Forgot password"
 3. Or log in with GitHub again
 4. Check browser isn't blocking cookies
-

Pro Tips

1. **Always test locally first** (`npm run dev`)
 2. **Commit often** with clear messages
 3. **Use Sanity's "Preview" mode** before publishing
 4. **Keep Sanity Studio deployed** for easy access
 5. **Take screenshots** of your settings (for reference)
 6. **Document custom changes** you make
 7. **Wait 2-3 minutes** after publishing before panicking!
-

Mobile Testing

Test on real devices:

1. Push to GitHub
2. Wait for deploy
3. Open on phone
4. Test all interactions

Or use browser DevTools:

1. `npm run dev`
 2. Open DevTools (F12)
 3. Click device icon
 4. Select phone model
-
